

MONKEY THEORY

“There is a **monk in every **monkey**.”**

Unfortunately, every monkey dies without being a monk.

Being a monk is very tough for a monkey.

Why?

1.
Monkey fails to find out the inner monk

2.

Monkey finds the inner monk, but does not realise it

3.
**Monkey realizes the inner monk but never
wants to be a monk**

**4.
Monkey wants to be a monk, but does not know
'how'**

5.

Monkey knows how to be a monk. But never tries to be it because of the pain involved in being a monk

6.

Monkey tries to be a monk. But the world does not allow him to become a monk by saying, “You are not a monk stuff. You are a monkey stuff”

7.

Monkey becomes a monk, but the world does not accept him as a monk.

If a monkey can't cross these **barriers**,
he will never become a monk.

Thank
you
